This application has been filed on April 30, 2001 with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stopperanl. (U.S.P.NO. 5,428,190) or Casson et al (USPNO. 5,502,889).

Claims 11-23 are also rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yam et al. (U.S.P.NO. 6,238,597) or Casson et al (USPNO. 5,688,584).

It is noted that the references need not be express all the recitation in order to anticipate which is supported by the following case law:

Schering Corp. v. Geneva Pharmaceuticals Inc., 64 USPQ2d 1032 (DC NJ 2002) Decided August 8, 2002. **The prior art disclosure need not be express in order to anticipate.** Even if a prior art inventor does not recognize a function of his or her process, the process can anticipate if that function was inherent. **To establish inherency,** the extrinsic evidence must make clear that the missing descriptive matter **is necessarily present** in the thing described in the reference, and **that it would be so recognized by persons of ordinary skill.** Inherency is not necessarily coterminous with the knowledge of those of ordinary skill in the art. Artisans of ordinary skill may not recognize the inherent characteristics or functioning of the prior art. However, the discovery of a previously unappreciated property of a prior art composition, or of a scientific explanation for the prior art's functioning, does not render the old composition patentably new to the discoverer. Insufficient prior understanding of the inherent properties of a known composition does not defeat a finding of anticipation.

Cited Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ameen et al (USPNO. 5,591,034), Casson et al (USPNO. 5,727,310) and Canning et al (USPNO. 5,738,465) are also cited to show an interconnecting between an optically transmissive unit and an isotropic conductive film respectively.
